

**Proactive and Interactive Security that
Protects Your People, Your Property, and
Provides You with Absolute Peace of Mind**

**Powered by AI and
Live Security Professionals**

**Verification in Real Time.
Immediate Intervention.**

Smarter Security. Safer Environments. Real Results.

Prevent Incidents ● Reduce Costs ● Real-Time Visibility ● Faster Response

Industries We Serve

Gated Communities ● Offices ● Warehouses ● Hotels ● Restaurants
Construction Sites ● Auto Dealerships ● High-Rise Buildings ● Parking Lots
Schools & Universities ● Retail ● Government Facilities ● ...and much more.

**Enhance Security and Lower Costs with
Our Virtual Interactive Solutions**

About VISS Technologies

VISS Technologies is a premier commercial security integrator dedicated to protecting what matters most. We specialize in designing, installing, and maintaining sophisticated security ecosystems for commercial end-users and security directors who require uncompromising reliability. We combine advanced technology, intelligent monitoring, and experienced professionals to deliver security systems that are proactive—not reactive.

Leading organizations choose VISS for interactive technology that predicts and prevents threats – not just records them – plus complete system integration and proven 24/7 support.

Our process:

- ▶ Free site surveys and security assessments
- ▶ Custom system design tailored to your property
- ▶ Professional installation by certified technicians
- ▶ Hands-on training for your staff
- ▶ Preventive maintenance programs
- ▶ 24/7 technical support and rapid response
- ▶ Easy system upgrades and expansions as you grow

What Makes Us Different

Integration-first mindset

All systems work together seamlessly

AI-powered intelligence

Smarter detection, fewer false alarms

Human + technology approach

The best of both worlds

Scalable solutions

Grow as your business grows

End-to-end service

From design to ongoing support

Comprehensive Protection, Custom-Tailored. We don't believe in "out-of-the-box" security. We build systems around your specific operational needs.

OUR SOLUTIONS & SERVICES

Interactive Video Surveillance

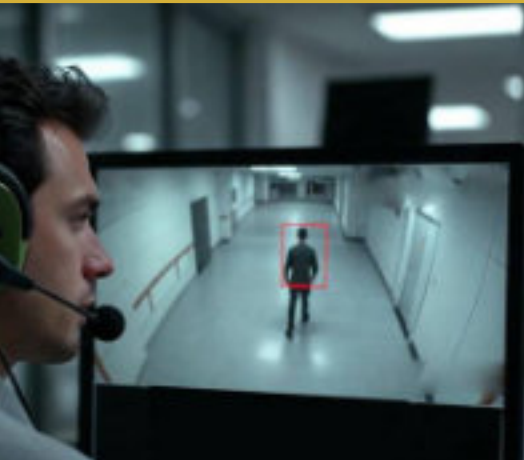

- ▶ High-definition cameras with intelligent analytics
- ▶ Real-time alerts and remote viewing
- ▶ AI-driven detection (people, vehicles, behaviors)
- ▶ Cloud and on-premise solutions

Your Benefit: Detect threats early. Gain full visibility across your property.

Managed Access Control

- ▶ Keycard, mobile, and biometric access
- ▶ Multi-door and multi-site management
- ▶ Remote access control via smartphone or desktop
- ▶ Audit trails and reporting

Your Benefit: Improve security while simplifying access management.

Remote Guarding & Virtual Concierge

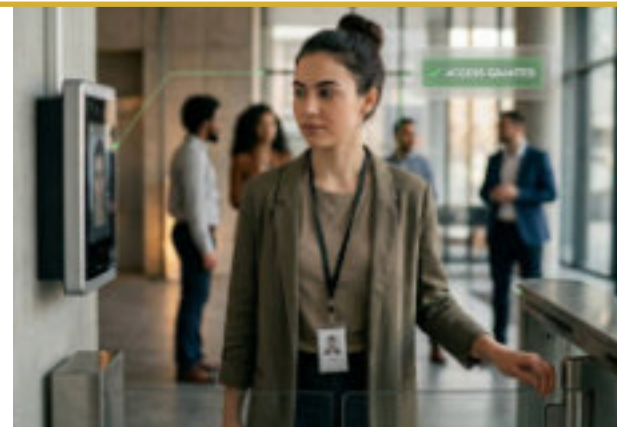

- ▶ Live monitoring by trained professionals
- ▶ Real-time intervention (audio warnings, alerts)
- ▶ Immediate response to suspicious activity
- ▶ 24/7 coverage

Your Benefit: A smarter alternative to traditional security guards.

AI & Intelligent Analytics

- ▶ License plate recognition
- ▶ Facial recognition (where applicable)
- ▶ Advanced reporting and insights

Your Benefit: Move from reactive security to proactive prevention.

Our services also include elevator control, parking entry, and intrusion. Our alarm systems are fully integrated with your video and access systems, providing instant verification of alerts to reduce false alarms and accelerate emergency response. Whether you are looking to secure a single corporate office or a multi-site industrial complex, VISS Technologies has the expertise to bring your security into the modern era.

Why Upgrade Your Security System?

Many organizations rely on legacy systems that are difficult to manage, unable to communicate, share information, and integrate with modern systems. Modernizing your security infrastructure isn't just an IT upgrade—it's a business investment.

Older systems are no longer enough to handle today's threats. That being said, in many cases, we can upgrade your system without changing cameras or other equipment. For instance, we can take your existing cameras and turn them into smart AI cameras.

Common Challenges:

- ▶ Outdated cameras with poor image quality
- ▶ Too many false alarms
- ▶ Limited remote access
- ▶ Systems that don't work together
- ▶ High labor costs for monitoring

Are you ready to elevate your security standards while optimizing operational costs?

The VISS Technologies Advantage

Proactive Protection

Identify and stop threats before they escalate

Operational Efficiency

Automate processes and reduce manual work

Cost Savings

Lower guard costs and reduced losses

Better Control

Access your system anywhere and at any time

Future Ready Technology

Scalable solutions that evolve with your needs

Integrated Security

All your systems working together as one
